

ICAR–IIRR, Hyderabad actively participated in the inauguration of PM Dhan Dhanya Krishi Yojana

The Hon'ble Prime Minister inaugurated the PM Dhan Dhanya Krishi Yojana, a transformative initiative aimed at ensuring holistic agricultural development, improving farmers' income, and promoting sustainable and resilient farming systems. As part of the event, around 150 farmers from Rangareddy, Bhongir, and Mahabubnagar districts of Telangana visited ICAR–IIRR and actively participated in the proceedings. The live telecast of the national-level launch was attended by esteemed farmers, scientists, staff, at the ICAR–Indian Institute of Rice Research (IIRR), Hyderabad.

During his address, the Hon'ble Prime Minister emphasized the importance of effectively utilizing all agricultural schemes and programs to maximize benefits for the farming community. He urged farmers, researchers, and extension agencies to work in convergence for the successful implementation of various government initiatives that collectively contribute to agricultural growth and national food security.

The program showcased various flagship schemes, farmer-oriented projects, and technological interventions designed to enhance productivity, ensure resource-use efficiency, and strengthen the agricultural value chain. Scientists and staff from ICAR–IIRR actively participated in the virtual event, aligning the institute's research priorities with the goals outlined under the PM Dhan Dhanya Krishi Yojana.

A Farmer–Scientist Interaction Session was organized, providing an open platform for farmers to express their queries and seek technical clarifications on various aspects of rice production and management.

Dr. Ch. Padmavathi, Dr. Amtul Waris, Dr. R. M. Kumar, Dr. Jyoti Badri, and Dr. Kanneboina Shruthi interacted actively with the visiting farmers, addressing questions related to newly released rice varieties, production technologies, pest and disease management strategies, and sustainable cultivation practices developed at ICAR–IIRR, Hyderabad.

Additionally Drs Brajendra and Manasa demonstrated the soil health kit to the farmers for assessing the soil fertility of the fields.

The event served as a meaningful interface between scientists and farmers, reinforcing the institute's role in translating research outcomes into field-level applications and contributing towards achieving the objectives of national agricultural development under the PM Dhan Dhanya Krishi Yojana.
